

**PERENNIALS
BY DESIGN**

PERENNIALS

- Come back year after year.
- Typically die back in the fall/winter.
- Come in a variety of colors and textures
- Typically use much less water than annuals and lawn

ANNUALS

- Do NOT come back year to year
- Most will die back once fall comes. Some annuals are more cold hardy. EX: Pansies and Ornamental cabbage
- Typically need watering at least every other day in the ground
- Do very well in containers

BIEANNUALS

- Flower every other year
- Die back for fall/winter
- Will return in spring with either only foliage or foliage and flowers.

PICKING PERFECT PERENNIALS

- Choose a style
- Check for insects
- Figure out your USDA hardiness Zone
- Read the plant tags
- Stagger bloom times

DOLCE® 'Blackberry Ice'
Coral Bells

HEIGHT: Short: 10-12" / Corto: 25-30cm
SPACING: Min: 18" Max: 22" /
Mín: 45cm Máx: 56cm
ZONES: Hardy in zones 4-9 to -25°F /
Resistente en zonas 4-9 hasta -32°C
BLOOM: Midsummer /
Verano medio
LIGHT: Sun to shade /
Sol a sombra

FEATURES: Prized for its iridescent purple leaves with a softly luminescent pewter overlay. Forms a full, rounded mound of foliage topped by reddish purple scapes and cream flowers. / *Premiada por sus hojas iridescentes de color púrpura con un revestimiento plateado suavemente luminescente. Forma un montículo de follaje redondeado cubierto por paños de color púrpura rojizo y flores de color crema.*
CARE: H. villosa hybrid naturally heat and humidity tolerant. Thrives in part shade but grows in sun or shade. Well-drained soil is required. Salt tolerant. / *Híbrido H. villosa, naturalmente tolerante al calor y la humedad. Crece en la media sombra pero también en el sol o la sombra. Se necesita suelo bien drenado. Tolerante a la sal.*
PAIR WITH: Ligularia, Speedwell, Hostas, Ferns, Bleeding Heart, Hardy Geranium, Violets, Sedg, Foxglove, Foamflower

SPRING MAINTENANCE

- Fertilizing is a good idea
- Spring cleanup
- Stay on top of the weeds!
 - Applying pre-emergent may help
 - Watering with drip will help prevent weed growth
- 2nd best time to plant
- Make sure your irrigation is working

SUMMER MAINTENANCE

- Deadhead to encourage more blooms
- Stay on top of the weeds!
 - Could potentially re-apply a pre-emergent.
 - Make sure you don't apply in the heat of the day! Early morning before the wind picks up is best
 - Not the best time to plant

FALL MAINTENANCE

- Cut back and clean up plants as they die back to the ground
 - A few exceptions
- Stay on top of the weeds!
